Steeling the Show

The lights are a mix of rich Indian artisanal skills and new technology, where each piece is customised to varied requirements. All of the collections are marked by stainless steel and warm colours that create soft uniform lighting in a fluidic manner. The inspiration was to reflect on the solidity of simplistic shapes and at the same time present light as a guiding phenomenon in defining the substance of those shapes.

Sogani is a signature brand of lights and light installations, by international award winning artist and designer Vibhor Sogani. At brand Sogani, quality craftsmanship and creative design solutions that add value and beauty to everyday life are quintessential. Along with avant-garde aesthetics, the designs fuse innovative use of material with state-of-the-art technology to create lights that are bespoke and sculptural. Personalised and exclusive, each piece is customised to suit the desired space and lifestyle. The studio's eclectic repository of over sixty indigenous designs continues to grow as it explores broader avenues of concept light installations.

Casa

Inspired from a Weaver bird's nest, Casa is a tribute to the home in the natural world. This homogeneous blend of burnished beads forms a cocoon of comfort. The light coming from the egg-shape marbled glass adds life to the installations. This mercurial symbol can liven up any space. The ever changing, multiple reflections produce an appealing visual texture.

Cost – Price on request
Material – Stainless Steel

Folds

Crafted from a single sheet of metal, each individual fold is the result of deliberate and meticulous thought. Subtle and bold, each piece is a part of the larger visual lexicon. The mirror-finished pieces with copper leafing form an ocular symphony that can transform into a centre-piece or a corner piece in any living space.

Cost – Starts from INR 30,000/-
Material – Stainless Steel

Drape

Free-flowing contour of fabric metamorphoses into a metallic drape. Beaded twines of metal come together in an asymmetrical formation that transforms into this luminescent delight. The dappled reflections, bouncing off each other, glitter like tiny stars that can light up an open atrium or an indoor lobby. Fluid curves inspired by a sensuous form, combined with the solidity of the lustrous beads create a shape that entices observers, to come closer and delve into the mysteries it holds within.

Cost – Starts from INR 8,00,000/-
Material – Stainless Steel

Palm

Sunny days, warm breeze and sunlight dappling through fingered palm leaves. This is the inspiration behind this faceted formation. The prism like surface radiates a light that gently draws into the folds of its golden aura. Ideal to adorn a palatial living space, it can also add romance to a personal corner.
